

PADI Specialty Courses during the month of May at Scubadive West!

Scubadive West is delighted to announce a range of Specialty dive courses taking place during the month of May.

Any diver from Openwater level and upwards can participate!

Digital Underwater Photo Specialty 16 & 17th May

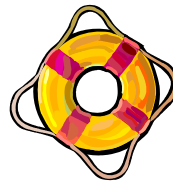

The PADI Digital Underwater Photo Specialty introduces you to the world of underwater photography with user friendly digital cameras. Our course will help you choose the right camera system based on your needs, will teach you the PADI SEA method for getting great shots quickly and introduce the 3 primary principles for great underwater photography. Bring along your own digital camera or use one of Scubadive West's. Snap Happy!!

National Geographic Diver Specialty 23rd & 24th May

Join an elite group of divers who are more than just tourists, but explorers, adventurers and conservationists. As part of this course you will fine tune your buoyancy and navigation skills; both crucial to positive interaction with the marine environment. Finally, you will complete an underwater project to include mapping and surveying Scubadive West's house reef. This is your chance to think, observe and document like those who dive for science and discovery.

Boat Diver Specialty 30 & 31st May

Make diving from a boat more comfortable by learning some important techniques. During this two day course we will teach you how to safely enter and exit the water, make sure you know your port from your starboard and your bow from your stern, and use surface lines to initiate and conclude dives.

Ahoy there matey!

Any member of Scubadive West staff would be delighted to talk you through these courses.
